Claims

[1] A compact thermal exchange device for thermo-electric cooling mode, the device comprising:

a thermal electric cooling unit formed around a center of the compact thermal exchange device;

two plates in the thermal electric cooling unit, each of the plates being formed on an upper side and a lower side of the unit, respectively;

two housing walls, each of the housing walls being installed on the upper side and the lower side of the thermal electric cooling unit, respectively;

a plurality of heat pipes directly inserted into the plates;

a plurality of fins formed on the heat pipes;

an external fan provided over the fins; and

an internal fan provided under the fins.
